THE ROLE OF ORAL HEALTH IN SPORTS SYMPOSIUM

10th October 2018

Target Audience:

Internal and external participants: Dentists, Physicians, Nurses, Allied Health Professionals (Dental Assistants, Dental Hygienists, physiotherapists and Radiographers).

Overall Objectives:

Participants will be able to:

- 1 Define Periodontitis and its relationship to implant treatment
- 2 Identify types of dento-alveolar trauma and the different treatment options
- 3 Evaluate the best approach to management of acute dental trauma
- 4 Explain the effects of oral health on general health.
- 5 Apply skills and knowledge to prevent simple trauma

This activity is an Accredited Group Learning Activity (Category 1) as defined by the Qatar Council for Healthcare Practitioners – Accreditation Department and is approved for a maximum of 5.5 hours.

Time	Topic	Session Specific Learning Objectives	Speaker
07:45-08:15	Registration		
08:15-08:20	Welcome		Dr. Mohammed Alsaey – SPC chair
08:20-08:25	Discussion learning objectives	Overall learning objectives	Dr. Mohammed Alsaey – SPC chair
08:25-09:00 <i>08:50-09:00 Q & A interactive</i>	Management of sport & acute dental trauma with dental implants	<ol style="list-style-type: none"> 1. Summarize the management of all classifications of sport and acute dental trauma. 2. Demonstrate the best timing of doing dental implant post tooth removal due to acute or sport dental trauma. 3. Discuss the necessity of Hard- and wsoft-tissue management by doing dental implant in aesthetic zone. 	Dr. Ghadir Taraben
09:00-09:30 <i>09:25-09:30 Q & A interactive</i>	Crossing the boundaries of excellence in implants inserted in posterior maxillofacial	<ol style="list-style-type: none"> 1. Demonstrate the diagnostic protocol for proper examination of the posterior ancillary region. 2. How to establish a full sequential treatment plan according to each specific clinical situation involving implant rehabilitation of the posterior maxilla. 3. Demonstrate and discuss the different surgical techniques for maxillary sinus lifting and grafting. 4. Determine the common related intraoperative and postoperative complications and their management. 5. Identify the challenges, expected clinical outcome and the difficulty index for proper patient selection. 	Prof. Ramy Ragab Elbially

Time	Topic	Session Specific Learning Objectives	Speaker
09:30-10:00 09:55-10:00 Q & A interactive	Peri - Implantitis : Recognize, Treat & Prevent	1. Interpret the patho-physiology of Peri - Implantitis. 2. Identify the signs of Peri - Implantitis and be able to determine the cause of Peri - Implantitis. 3. Distinguish between Peri - Implantitis and Mucositis and evaluate if the Implant is Ailing or Failing. 4. Solve the existing situation of Peri-Implantitis. 5. Predict and prevent Peri - Implantitis.	Dr. Siddharth Bhalerao
10:00-10:15 Coffee Break			
10:15-10:45 10:35-10:45 Q & A interactive	Safe removal of an injured athlete from the field of play	1. Explain the role of sports dentistry in the field. 2. Define types of oral injuries 3. Why an immediate response is important in oral injuries.	Dr. Mohammed Alsaey
10:45-11:15 11:10-11:15 Q & A interactive	Dental prevention and management of cases prone to damage by simple trauma	1. Explain how to prevent the possibility of more trauma to the protruded teeth. 2. Outline of preventing cervical fracture to teeth that have received root canal treatment. 3. Determine prevention management of tooth fractures.	Dr. AbdulHakim AlYafei

Time	Topic	Session Specific Learning Objectives	Speaker
11:15-11:45 11:40-11:45 Q & A interactive	Endodontic management of dental trauma	1. Classify consequences of dental trauma affecting dental pulp 2. Discuss treatment of pulp involved trauma 3. Measure success & failure through comprehensive follow up process	Dr. Wael Waheed
11:45-12:15 12:05-12:15 Q & A interactive	Interdisciplinary Dentistry for a Better Treatment Outcome	1. Illustrate the multidisciplinary nature of dental care. 2. Outline the role of different disciplines in dentistry in providing optimum patient care. 3. Demonstrate the importance of communication between different disciplines/ specialties of dentistry in the provision of patient care.	Dr. Atef Hashem
12:15-13:15 Lunch Break			
13:15-13:45 13:40-13:45 Q & A interactive	Dento alveolar trauma	1. Prioritize the importance of proper diagnosis of dentoalveolar trauma. 2. Discuss the benefits of early treatment . 3. Apply the signs and symptoms dentoalveolar trauma.	Dr. Islam Mohammed
13:45-14:15 14:10-14:15 Q & A interactive	Sports Nutrition and Health, now and future directions	1. Examine perceptions of sports nutrition and its impact on health 2. Evaluate the benefits and negative perceptions related to sports nutrition and health 3. Develop solutions to optimize health using sports nutrition and food science as a vehicle for change.	Daniel Kings

Time	Topic	Session Specific Learning Objectives	Speaker
14:15-14:55 14:35-14:55 Q & A interactive	A journey through mouthguard fabrication (video session) followed by an interactive session of Questions and feedback.	1. Summarize the importance of taking a proper impression. 2. Explain how to fabricate the perfect mouthguard using a simple articulator-mounting technique 3. Distinguish between a custom-made mouthguard and a boil-and-bite.	Esther Schunke
14:55-15:00	Closing		Dr. Mohammed Alsaey

Scientific Planning Committee Members:

Dr. Mohammed Alsaey, Dr. Rachid Bouras, Ashley Knight, Helen Lloyd and Emma Bellwood.

The Scientific Planning Committee has reviewed all disclosed financial relationships of speakers, moderators, facilitators and/or authors in advance of the CPD activity and has implemented procedures to manage any potential or real conflicts of interest.
